---

## **Company Profile:**

Our client is an international building and engineering firm that is looking for experienced professionals for its large projects in its overseas operations.

## **Job Description:**

Working in large oil & gas and/or large construction projects, the Project Planner will be an essential member of the operations team in Libya/Qatar.

- Reporting to the Project Manager
- Responsible for maintaining the project's program plan

## **Required Skills, Education or Experience:**

- 5-10+ years of Experience in Construction and/or Oil and Gas (multiple roles available depending on experience and expertise – Junior and Senior positions)
- Civil Engineering Degree or similar with good understanding of the construction process
- Experience in large building projects or other civil engineering projects
- Excellent command of the English language and good communication skills
- Dependable, professional and accurate
- Experience with and very good knowledge of Primavera (P3/5 or P6)
- Ability to produce/maintain detailed programs of work (1000-5000 activities)
- Produce/maintain programs of work with Resource Loading.

## **Salary and Benefits:**

Our client has a large portfolio of projects in multiple locations and has a great reputation of taking care of its employees, offering good compensation/benefits package and perks.

- Salary depending on experience (Tax Free).
- Accommodation facilities provided and included in compensation package.
- Medical and Insurance.
- Paid flights (multiple tickets throughout the year - number depending on seniority)
- Paid days off - number depending on seniority
- Minimum living costs
