<b>Job Title</b>	:	Ruby on Rails (RoR) Developer-Analyst
<b>Region</b>	:	Den Haag Area, The Netherlands
<b>Languages Required</b>	:	English & Dutch

---

Be successful in a very entrepreneurial environment and get the chance to further develop your skills and grow as part of an international team.

**The Opportunity:**

An exciting opportunity for an experienced software developer/analyst, with hands on Ruby on Rails (RoR) and MySQL experience to play a crucial role to translating client needs and software requirements into technical design and products.

**Main Responsibilities:**

- Developing, designing and testing new functionalities and implementing them in current and new products.
- Reviewing designs, improving and maintaining existing products.
- Contributing to optimization of products and processes.
- Working closely with R&D and system engineers.

A detailed job description and role responsibilities are available upon request.

**Qualifications:**

**Candidates must have:**

- Bachelor/HBO IT related.
- 2+ years hands on experience with Ruby on Rails (RoR) and MySQL.
- Fluent English & preferably Dutch
- Strong team player with ability to work in a diverse team.
- Strong problem solving skills.
- Ability to translate needs into design/solutions.
- Customer service mentality and good communication skills.
